1. NATURE OF OPERATIONS AND GOING CONCERN

RT Minerals Corp. (the "Company") was incorporated under the Business Corporations Act of British Columbia on March 9, 2007. The Company's business activity is the exploration and evaluation of mineral properties in Canada. The Company is listed on the TSX Venture Exchange ("TSXV"), having the symbol RTM-V, as a Tier 2 mining issuer.

The address of the Company's corporate office and principal place of business is 300 - 555 West Georgia Street, Vancouver, British Columbia, Canada.

The Company has not generated revenue from operations since inception. The Company has a working capital deficiency of $52,837 as at February 29, 2016, has accumulated losses of $11,583,787 since inception and expects to incur further losses in the development of its business, all of which may cast significant doubt about the Company's ability to continue as a going concern. The Company's ability to continue as a going concern is dependent upon its ability to raise financing and generate future profitable operations. As the Company is in the exploration stage, the recoverability of costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties. The Company will periodically have to raise funds to continue operations, and although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

2. BASIS OF PREPARATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

These condensed interim consolidated financial statements for the three month period ended February 29, 2016 have been prepared in accordance with IAS 34 Interim Financial Reporting. They do not include all disclosures that would otherwise be required in a complete set of financial statements and should be read in conjunction with the Company's 2015 annual financial statements which have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The condensed interim consolidated financial statements have been prepared using accounting policies consistent with those used in the Company's 2015 annual financial statements except for new standards, interpretations and amendments mandatorily effective for the first time from January 1, 2015. Note 2c) sets out the impact of new standards, interpretations and amendments that have had a material effect on the financial statements.

The condensed interim financial statements were authorized for issue by the Board of Directors on April 29, 2016.

The preparation of condensed interim consolidated financial statements in compliance with IAS 34 requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas where significant judgments and estimates have been made in preparing the financial statements and their effect are disclosed in note 3.

a) Basis of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, RT Minerals Corp (Guyana) Inc. ("RTMG"). RTMG was incorporated in Guyana. Inter-company balances and transactions, including unrealized income and expenses arising from inter-company transactions, are eliminated on consolidation.

2. BASIS OF PREPARATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

b) Foreign Currency Translation

The presentation currency and functional currency of the Company and its Guyana subsidiary is the Canadian dollar as this is the principal currency of the economic environment in which they operate. The Company's Guyana subsidiary is financially and operationally dependent on the Company. The Company translates transactions in foreign currencies into Canadian dollars at the rates of exchange prevailing at the dates of the transactions. Monetary assets and liabilities are translated at the exchange rates in effect at the consolidated statement of financial position date. Non-monetary assets and liabilities are translated at historical rates. The resulting exchange gains or losses are recognized in comprehensive income (loss).

c) New Accounting Standards, Interpretations and Amendments to Existing Standards

The following new standards, amendments and interpretations are effective for annual periods beginning on or after January 1, 2018, have not been early adopted in these consolidated financial statements and are not expected to have a material effect on the Company's future results and financial position:

IFRS 15 ***Revenue from Contracts with Customers*** – In May 2014, the IASB issued IFRS 15 – Revenue from Contracts with Customers ("IFRS 15") which supersedes IAS 11 – Construction Contracts, IAS 18 – Revenue, IFRIC 13 – Customer Loyalty Programmes, IFRIC 15 – Agreements for the Construction of Real Estate, IFRIC 18 – Transfers of Assets from Customers, and SIC 31 – Revenue – Barter Transactions Involving Advertising Services. IFRS 15 establishes a comprehensive five-step framework for the timing and measurement of revenue recognition.

IFRS 9 ***Financial Instruments*** **-** In November 2009, as part of the IASB project to replace IAS 39 *Financial Instruments: Recognition and Measurement*, the IASB issued the first phase of IFRS 9 that introduces new requirements for the classification and measurement of financial assets. The standard was revised in October 2010 to include requirements regarding classification and measurement of financial liabilities. In November 2013, new general hedge requirements were added to the standard. In July 2014, the final version of IFRS 9 was issued and adds a new expected loss impairment model and amends the classification and measurement model for financial assets by adding a new fair value through other comprehensive income category for certain debt instruments and additional guidance on how to apply the business model and contractual cash flow characteristics.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

There has been no material revisions to the nature of judgments and amount of changes in estimates of amounts reported in the Company's 2015 annual financial statements.

4. SHORT-TERM INVESTMENTS

Pursuant to a property sale agreement described in Note 5(a) below, the Company received 1,000,000 common shares of Investissements Gema Inc. ("Gema"), a private company incorporated in Canada, on October 28, 2015, which have been recorded at a nominal value. Pursuant to a letter agreement dated February 25, 2016, the Company and Gema agreed to exchange the 1,000,000 common shares of Gema into 1,000,000 common shares (the "Shares") of Opawica Explorations Inc. ("Opawica"), a company with directors in common with the Company. The exchange of the Shares is subject to Gema's sale of certain properties to Opawica and TSXV acceptance of the transactions contemplated hereby.

10. RELATED PARTY TRANSACTIONS

All related party transactions are recorded at the exchange amount which is the amount agreed to by the Company and the related party.

a) Office Expenses

Office expenses of $1,250 (2015: $9,086) were charged by a company with common directors that is a co-tenant to the Company's office premises sublease. At February 29, 2016, $95 (November 30, 2015: $183) in amounts owing to the co-tenant were included in due to related parties.

b) Key Management Compensation

Key management personnel are persons responsible for planning, directing and controlling the activities of an entity, and include directors, the chief executive officer and chief financial officer of the Company. Key management personnel compensation is comprised of the following:

	2016 **$**	**2015** **$**
Short-term employee benefits and director fees	9,500	1,500
Share-based payments	-	-
	9,500	1,500

Due to related parties at February 29, 2016 includes $487 (November 30, 2015: $9,997) in amounts owing to directors, officers, and companies with common directors for unpaid project management services and expenses.

11. COMMITMENTS

i) In relation to a December 2013 flow-through financing, the Company was committed to incur $99,800 in Canadian exploration expenditures by December 31, 2014 under Canada Revenue Agency's look-back rule. The Company incurred an aggregate of $22,720 in qualifying exploration expenditures in 2014 and amended its Income Tax Act (Canada) filings to reduce the expenses renounced under the look-back rule by $77,080. The Company has recorded a provision of $41,466 in estimated liability to indemnify shareholders for shortfall of flow-through tax credits.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Fair values

The Company's financial instruments include cash, amounts receivable, trade and other payables, and amounts due to related parties. The fair value of these financial instruments approximates their carrying values due to the relative short-term maturity of these instruments.

The following table summarizes information regarding the carrying and fair values of the Company's financial instruments:

(Expressed in Canadian Dollars)

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

	February 29, 2016		**November 30, 2015**	
	Fair Value $	**Carrying Value $**	**Fair Value $**	**Carrying Value $**
FVTPL assets (i)	35,943	35,943	78,160	78,160

(i) Cash and short-term investments

The Company classifies its fair value measurements in accordance with an established hierarchy that prioritizes the inputs in valuation techniques used to measure fair value as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities

Level 2 - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices), and

Level 3 - Inputs for the asset or liability that are not based on observable market data.

The following table sets forth the Company's financial assets measured at fair value on a recurring basis by level within the fair value hierarchy as follows:

As at February 29, 2016	Level 1 $	Level 2 $	Level 3 $	Total $
Cash	35,943	-	-	35,943

The Company believes the recorded values of all other financial instruments approximate their current fair values because of their nature and respective maturity dates.

The Company's financial instruments are exposed to certain financial risks: credit risk, liquidity risk, market risk and currency risk.

Credit risk

Credit risk is the risk of an unexpected loss associated with counterparty's inability to fulfil its contractual obligations. Management evaluates credit risk on an ongoing basis and monitors activities related to amounts receivable including the amounts of counterparty concentrations. The primary sources of credit risk for the Company arise from its financial assets consisting of cash and amounts receivable. The carrying value of these financial assets represents the Company's maximum exposure to credit risk. To minimize credit risk the Company only holds its cash with high credit chartered Canadian financial institutions. As at February 29, 2016, the Company has no financial assets that are past due or impaired due to credit risk defaults.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations with respect to financial liabilities as they fall due. The Company's financial liabilities consist of its accounts payable and amounts due to related parties. The Company handles its liquidity risk through the management of its capital structure as described in Note 13. All of the Company's financial liabilities are due on demand, do not generally bear interest and are subject to normal trade terms.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

The following are the contractual maturities of financial liabilities as at February 29, 2016:

	Carrying Amount $	Contractual Cash Flows $	Within 1 year $	Within 2 years $	Within 3 years $	Over 3 years $
Trade payables	49,019	49,019	49,019	-	-	-
Due to related parties	582	582	582	-	-	-
Total	49,601	49,601	49,601	-	-	-

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, investment fluctuations, and commodity and equity prices. Market conditions will cause fluctuations in the fair values of financial assets classified as held-for-trading, available-for-sale and cause fluctuations in the fair value of future cash flows for assets or liabilities classified as held-to-maturity, loans or receivables and other financial liabilities. The Company is not exposed to significant interest rate risk as the Company has no fluctuating interest bearing debt. The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in gold and metal prices. Management closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Currency risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currencies. The Company does not hedge its exposure to fluctuations in foreign exchange rates.

The Company's Guyana subsidiary is exposed to currency risk as it incurs expenditures that are denominated in US dollars while its functional currency is the Canadian dollar.

13. CAPITAL MANAGEMENT

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern such that it can support continued development of its exploration and evaluation assets, pursue the acquisition and exploration of other mineral interests, and to maintain a flexible capital structure for its projects for the benefit of its shareholders and other stakeholders. The Company is not exposed to externally imposed capital requirements.

The Company considers items included in equity to be capital. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust its capital structure, the Company may issue new shares, sell assets to settle liabilities, option its properties for cash from optionees, enter into joint venture arrangements, return capital to its shareholders or adjust the amount of cash.
