## NEWS RELEASE

### RT MINERALS CORP. STAKES LAC MICA PROPERTY CLAIMS

**Vancouver, B.C. – June 17, 2016** - RT Minerals Corp. (TSX.V: RTM) (the “Company”) has staked 19 claims in the Saint-Michel-des-Saints area, located approximately 130 km north of Montreal, Quebec, as a potential lithium property. This property, named “Lac Mica”, is accessible by car.

The target rock on the Lac Mica property is a pegmatite rich in mica. A past producing mica mine was formerly located on the site. The mineralization described within Quebec government files is niobium, thorium, rare earths, biotite, muscovite and lepidolite, which are minerals indicative of the presence of lithium.

The technical information in this news release was prepared by Yvan Bussieres, P.Eng., qualified person under National Instrument 43-101 for RT Minerals Corp.

In addition to the Lac Mica property, the Company holds 100% interest, subject to retained royalties, in the Ballard Lake gold property, situated approximately 51 km northwest of Wawa, Ontario in the Echum and Dolson Townships, and the Golden Stock gold property in Cairo Township, Ontario, located several kilometers north east of the Young Davidson gold mine.
